

MS Applicant

Subject: Prospective MS Applicant Interested in Microbial Genomics

Dear Professor [Last Name],

My name is John Doe, and I recently completed my B.Sc. in Microbiology at Stanford University.

I came across your paper on microbial genome evolution and found it aligned with my undergraduate research on extremophiles.

During my time as a Research Assistant at the Stanford Microbial Genomics Lab, I developed a Python pipeline to automate genomic data analysis.

I'm particularly interested in expanding this work into bioinformatics approaches for understanding bacterial adaptation in extreme environments.

I'd be grateful for any advice you could share regarding current or upcoming opportunities in your lab.

Thank you for your time and consideration.

Sincerely,

John Doe
